

## Notice

January 20, 2020

According to NCBI, the **2019 Wuhan Pneumonia Virus Genome Sequence** had been removed, modified, updated (?) since January 14, 2020. We do not know if it is due to sequencing error, mutation of the virus or other reason? Therefore, we decide to wait for a few more days before releasing our latest report.

If you should have any question, please feel free to contact us at [info@rivermapsolution.com](mailto:info@rivermapsolution.com)

Thank you.

Sincerely,

Mai Wang
