

F Xue (Hong Kong)

17 Dec 2022

Tested positive for COVID-19 using Rapid Antigen Test

Symptoms: fever, insomnia (the first day), fatigue, muscle soreness (first few days), cough (sometimes with phlegm)

27 Dec 2022

Tested negative

Had a lingering cough afterwards

Had a video chat with Dr. Wang and showed her my tongue. Asked to drink the decoction of codonopsis

The symptom was gone a few days later
